---

### SUMMARY

Junior Full-Stack Web Developer with 1+ year of hands-on experience in building and deploying scalable web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). Seeking a challenging role as a Full-Stack Developer to contribute to modern, high-performance web solutions. Skilled in JavaScript, HTML, CSS, REST APIs, Git, and cloud deployment (Render, Vercel). Passionate about clean code, responsive design, and effective team collaboration.

---

### WORK EXPERIENCE

#### Junior Web Developer

- Junior Web Developer | Freelance | Sep 2024 – Present
- Built and deployed 4+ responsive web applications using the MERN stack for real-world clients.
- Improved front-end performance by 30% through optimized React.js and Vite setups.
- Developed cross-browser-compatible interfaces using HTML, CSS, JavaScript, and React.js.
- Translated business requirements into functional digital solutions in direct collaboration with clients.
- Utilized Git and GitHub for version control and collaborative development workflows.

---

### PROJECTS

- Below are selected web development projects that demonstrate my hands-on experience in building full-stack applications, implementing modern technologies, and solving real-world problems.
- 1-Shopverse – E-commerce Platform
- Built a full-featured e-commerce web application using React.js, Vite, Tailwind CSS, Express.js, and MongoDB. Includes user authentication, product browsing, cart system, and order management.
- 🔗 <https://shopverse-eg.vercel.app>
- 2-Filmawy – Movie Streaming Platform
- Developed a movie browsing platform using React.js, Vite, Tailwind CSS, Appwrite, Express.js, and TMDB API. Features include dynamic data fetching, and modern UI design.
- 🔗 <https://filmawy-app.vercel.app/>
- 3-Pharmaco – Medical Appointment System
- A full-stack medical web app built with Python, Django, and PostgreSQL. Allows users to register, log in, browse doctors, and book appointments. Includes authentication and admin dashboard.
- 🔗 <https://waelfarouk7.pythonanywhere.com>
- 4-Greenify – Agriculture Education Platform
- An agricultural information portal developed using Python, Django, and PostgreSQL. Provides crop-related data and educational content. Includes user account system and responsive design.
